

## **THE NOISE OF LOVE - TECHNICAL SHEET**

### **STAGE**

Minimum stage dimensions: 10 m length, 10 m depth (it is possible to use smaller stages by contacting the company in advance).

The stage must be clear of any obstructions upon the company's arrival.

Black PVC carpet covering the entire stage must be laid out upon the company's arrival.

Storage space for equipment and various materials is available.

For indoor theaters: black setup: black backdrop, 8 black legs (4 on each side), 4 black ceilings, already installed upon the company's arrival (according to the specifications provided by the company).

Sound and lighting control should be positioned at the front, preferably at the back of the room or in another location from which the entire stage can be viewed.

Important: the presence of an audio and lighting technician is required.

### **LIGHTING**

- 20 PCs of 1000 W
- 5 PAR lights with CP/60 bulbs
- 5 Shapers
- 6 Dominos of 1000 W
- Lighting console with memory capability
- Complete equipment including cables, hooks, and everything else in order

### **AUDIO**

- 4 microphones with stands
- P.A. amplification suitable for the venue
- 2 stage monitor speakers
- 2 CD players
- 1 mixer

### **OTHER REQUIREMENTS**

- 1 video projector capable of projecting to the back of the stage
- White projection screen for back stage with dimensions suitable for the stage space
- 1 DVD player
- Computerized console with memory capability

### **DRESSING ROOMS**

Sufficient to accommodate 4 people, with showers, mirrors, makeup tables, and natural mineral water.
